Dear GP/Referrer

**Re: Skye Castledine; DOB: 11 Jul 2017; NHS no: 717 520 4582**  
**The Poultry Farm Bungalow, Midville Lane, Stickney, PE22 8DN**

Thank you for referring Skye to The Community Paediatric Service.

The multi-disciplinary team have discussed the information you provided. Whilst we appreciate Skye may be presenting with concerns around behaviour and social communication, based on the information in the referral, an assessment with the Community Paediatrician is not considered the most appropriate intervention for addressing this need at this current time.

The multi-disciplinary team have identified that Skye continues to be open to the Selective Mutism Team who do not currently identify any concerns that relate specifically to autism. It would seem that Skye's difficulties relate more to her behaviour, selective mutism and learning.

At this point in time, we suggest that the support in place should continue and that further assessment is not indicated.

Yours sincerely

Triage Team  
Community Paediatrics
